5 Technology Trends That Have Been Supercharged By COVID-19

Fri Jul 17th, 13:00 - 14:00

In this webinar, futurist and internationally best-selling author Bernard Marr will discuss 5 of the biggest technology trends of our times and how the coronavirus epidemic has accelerated their adoption.

Bernard will talk about:

1. artificial intelligence
2. the 'as a service' and cloud revolution
3. 5G
4. extended reality (including augmented, virtual and mixed reality)
5. the robotics, drone and vehicle automation. Bernard will explain each of these trends, provide many practical examples, and discuss how they will transform businesses today and in the future.
